Unit 9: Greenhouse Gases

National Geographic Climate Change Jigsaw

You will be assigned one of four possible readings. It is your responsibility to carefully read your article from the *Climate Change* special issue of *National Geographic* and fill out the corresponding section below. You will be placed into a group with three of your classmates who read the other articles. You will share the main idea, the evidence and facts of your article with them. They will share their articles with you so that you can completely fill out the table below.

<p style="text-align: center;">Signs</p> <p>The main point of this article is:</p> <p>The evidence and facts that support this are:</p>	<p style="text-align: center;">Science</p> <p>The main point of this article is:</p> <p>The evidence and facts that support this are:</p>
<p style="text-align: center;">Energy Patterns</p> <p>The main point of this article is:</p> <p>The evidence and facts that support this are:</p>	<p style="text-align: center;">Solutions</p> <p>The main point of this article is:</p> <p>The evidence and facts that support this are:</p>
