Unit 9: Greenhouse Gases

Everyday Carbon

The purpose of this activity is to use your knowledge of the Carbon Cycle to examine examples of stored carbon. Working with your lab group, you must decide which process stored this carbon and what the item's next step in the Carbon Cycle is.

Processes that Store Carbon:

A. Primary Producer (photosyntheis by plants)
B. Primary Consumer
C. Fossil Fuel Deposits

Stored Carbon Station	How did the carbon get there?	Next Step in Carbon Cycle
