

## Sedimentary Rocks

### Salt Rocks: Day One

**Date:**

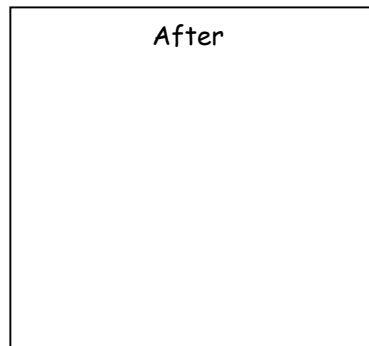

- Pour a half-inch of sand at the bottom of your Dixie cup
- Place a few pebbles in the cup on top of the sand
- Pour the salt-water solution on top of the sand and pebbles until they are *just* covered
- Write your group members names on the cup and place by the window to dry.
- Make a sketch of the rocks after you have mixed everything together in the "Before" box below.

### Salt Rocks: Day Two

**Date:**

- Remove your cup from the window and carefully cut and peel away the cup.
- Make a sketch of your rocks after this process in the "After" box.

- Sand and pebbles are .....
- Salt is a ....
- How did the sand and pebbles change?
- What happened to the salt water?
- In your own words, describe how a sedimentary rock is formed.
