

Unit 1 Objectives: Science Skills

By the time this unit is over, you should be able to:

- Distinguish between subjective and objective observations
- Explain the limitations of observations
- Choose appropriate lab equipment
- Demonstrate proper lab conduct
- Write a coherent, organized lab report
- Express numbers in scientific and standard notation
- Distinguish between a hypothesis and a theory

Vocabulary Squares:

Vocabulary Term

Definition
(in YOUR words)

Picture, written example of term

Subjective Observation		
Objective Observation		
Scientific Method		
Volume (include in your definition how to find volume of an irregular shaped object and a box)		
Mass
