

Classification of Matter

Classification Activity:

At your lab table there are samples of the following; milk, orange juice, mayonnaise, lemonade, copper, salt and sugar. Using what you know about how matter is classified and the chart above, classify each item as an element, compound, solution or suspension. Fill out the table below. Leave the "Notes" column blank - we will use this during our class discussion.

Item	Classification	Rationale	Notes
Milk			
Orange Juice			
Mayonnaise			
Lemonade			
Copper			
Salt			
Sugar
